

BUYER'S GUIDE

SPECIAL ADVERTISING SECTION PRESENTED BY *TECH & LEARNING*

AceReader

2016 Tech & Learning Award of Excellence Winner. AceReader is a powerful instructional web application designed to improve students' reading rates, fluency and comprehension. It's not a "how to read" program, rather a "how to read better" program. Students will learn how to be more efficient silent readers by breaking through the barrier of reading word-by-word to reading groups of words at a time with improved speed, fluency and comprehension. It includes a wide variety of leveled and themed reading comprehension tests, eye pacing drills and fun eye exercise games. The program will auto-adjust the training activities for each student based on their skill level. There is also a powerful interface for Teachers and Admins — they can manage student accounts and monitor students' progress. The Pre and Post testing system makes it easy to track overall progress for each student. For more information visit www.acereader.com or call 1-800-223-7323, ext. 2.

ClassLink

ClassLink provides OneClick and OneRoster. OneClick enables single sign-on access to web, Windows, and Google applications, and instant access to files at school and in the cloud. OneRoster easily and securely delivers class rosters to any publisher using open technology standards. Accessible from any computer, tablet or smartphone, ClassLink is ideal for 1to1 and Bring Your Own Device (BYOD) initiatives. ClassLink adoption continues to accelerate across the US, as does its roster of partners. ClassLink OneClick is now the preferred single sign-on platform for thousands of schools and districts around the world and for an increasing number of publishers and platform providers. Follow ClassLink on Twitter @ClassLink.

Edgenuity UpSmart™

Edgenuity UpSmart™ is a supplemental test readiness program that helps all students in grades 6–8 demonstrate mastery of state standards in ELA and math. With a completely adaptive learning engine, UpSmart gives every student the support they need at exactly the moment they need it. As students work through a variety of technology-enhanced tasks, UpSmart accumulates data about each student's understanding and adapts the difficulty of tasks, instruction, and practice accordingly. Learn more at Edgenuity.com/upsmart

ExploreLearning Gizmos

www.explorelearning.com

With Gizmos, Kids Get It.

Over 400 math and science Gizmos gives everyone something to graph, measure, and compare. That's hundreds of opportunities where students don't just act like scientists and mathematicians. They are.

Make Connections. Draw Conclusions.

Interactive design allows for extensive manipulation of variables and "what-if" experimentation. Visualizations and graphing tools help capture and compare results from experiments. In-depth activities create more moments to explore, discover and apply new concepts.

ExploreLearning Reflex

www.reflexmath.com

Adaptive and individualized, Reflex is a game-based online math fact fluency system that helps students master basic facts in addition, subtraction, multiplication and division.

When they use Reflex, kids love math.

Using fact families and delivering the right facts at the right time for each individual student, Reflex takes students at every level and helps them quickly gain math fact fluency and confidence.

Gaggle

www.gaggle.net

Gaggle has been keeping students safe for more than 15 years. If your school district uses G Suite for Education or Microsoft Office 365, talk to us about protecting your students and keeping them safe. Gaggle helps prevent bullying, inappropriate behaviors, school violence, and saves students lives.

Gaggle continues to innovate, providing school and district websites that exceed ADA compliance standards and work on all mobile devices. The company also offers affordable archiving and data backup for Exchange, Google apps, Office 365 and other leading communication platforms.

FileWave

"Go Beyond Managing Devices and Engage Your Users"

Since 1992, FileWave has lead the marketplace providing education, enterprise, and government institutions around the world with enterprise level multi-platform systems and mobile endpoint management software to assist IT teams throughout the lifecycle process of imaging, deployment, management, tracking and maintenance. FileWave's all-inclusive, highly scalable software solves the many challenges of managing a diverse and growing population of users, devices, and content by ensuring IT teams have a comprehensive solution that supports both client (desktop) and mobile devices across Windows, Mac, iOS and Android.

With FileWave, IT teams can efficiently secure and support their organizations from one easy-to-use console, making even the most daunting projects, such as BYOD or large 1:1 initiatives, manageable and highly effective.

Nepris

Learn how teachers are bringing professionals and experts into classrooms for live, virtual discussions. Nepris makes industry engagement part of your everyday classroom by empowering teachers to engage students in all areas of learning! Nepris is a cloud-based platform that connects teachers with industry professionals to bring abstract lessons to life, mentor students on class projects, evaluate student work, interview professionals and join virtual tours of workspaces. Nepris makes it easy for teachers to leverage industry connections while providing a reliable platform for companies to engage their employees with schools.

Join the community and engage industry in your CTE, project based learning (PBL), maker space or genius hour activities. Whether you need a geologist to talk about rocks, a chemist to give feedback on your student projects or a software engineer to chat with your students, we have all 16 career clusters covered. Sign up today at www.nepris.com

Powergistics

16-Shelf Short Locking Wall Tower

The newly designed 16-shelf tower has been shortened to better accommodate elementary classrooms. We've shortened our popular 16-shelf tower by 7" with the tallest shelf standing at 54 D" to allow

100% student deployment for all ages, including elementary students. Keeping with the same open concept design, small footprint, and unique cord management, the short 16-shelf wall mounted tower is making teachers lives easier while saving classroom space. The vertical design keeps devices organized, compact, and easy-to-access with an open concept so each stored device can quickly and easily be inventoried. With 100% student management, students learn responsibility and independence while teachers save countless hours managing their transition and teaching time without worrying about device deployment.

Rosetta Stone

Rosetta Stone is a global leader in technology-driven language and learning solutions, and for 25 years has provided educators with interactive English and World Language programs that change their students' lives. More than 22,000 education institutions worldwide have partnered with Rosetta Stone to develop their students' natural ability to read, write, and speak with confidence in a new language. Rosetta Stone® Foundations for K-12 is designed for beginner to intermediate students to learn skills needed for conversational proficiency. Foundations combines EdTech and proven methodologies for easy integration into a school's language program, increasing students' instructional access and opportunity in up to 24 languages. As students complete interactive language instruction they unlock the ability to practice their language skills through games, activities, stories, and live online conversations—leveled to their learning progress. Learn how combining Rosetta Stone Foundations with traditional language instruction complements any curriculum at <http://www.rosettastone.com/K12>.

Yup.com

Yup is America's leading provider of 1:1 tutoring support for schools. We connect students to tutors in 30 seconds, 24/7, for on-demand homework help and test prep support. Backed by Stanford University and Sesame Street, our tutors focus on (1)building student confidence, (2) developing growth mindsets and (3) ensuring mastery learning. Sessions are conducted over our secure, message-based mobile app. Yup tutors are high performing teachers and graduate students from elite colleges (e.g., Stanford, Harvard, Princeton, etc.). Over half-a-million students use Yup today in all 50 states from top prep schools to underserved communities. NOTE: Title I schools receive subsidized access. Email michael@yup.com for more info or visit www.yup.com/schools.
