

# LINKING TO LEARN WEBSITE PARAMETERS

## **Collaborative Project Title**

## **Overview of the Learning Episode**

Summarize your collaborative project

## **Instructional Site Inventory**

What piece of your site inventory is being utilized? Tell about your school site and what you discovered during the site inventory from the beginning of the year.

## **Collaborators (w/ links)**

Add your collaborators and their email links.

## **Guiding Question**

What is your guiding question?

## **Class Prediction**

Although your class may have had many, what question are you trying to answer and what is the "prediction" you have agreed upon as a class?

## **Procedure**

What did you do?

## **Observations / Data Collection**

Gather information from collaborators & add to your data

## **Student Interpretation of data (tables/graphs/charts/etc)**

Interpret your class data and the process of your collaborating classes

## **Draw conclusions**

What do you notice about your class data and the data from your collaborators?

## **Have kids summarize process (multimedia links)**

Your students can use multimedia software to reflect/show what they learned.  
Are there unanswered questions that were raised? What do the kids think?

## **How to connect with you: (email address link)**

This should be specific to your website and your contact information

## **Teacher Information Page**

Purpose, Proficiency outcomes, materials, time, background information, lessons learned
